

Conference Experience

May 12, 2008

This was my first conference, so I have nothing to compare it to, but I thought that even with the amount of people they had they did a pretty good job managing it. Obviously with that many people there's no way everybody is going to have the same experience, but I think most people had a good experience.

Trying to ride the escalators were really the only time that I felt claustrophobic. Hopefully if you go next year it will be a better experience, and if not, then I guess you will be one fewer person blocking the stairwell 😊

Thanks for sharing such useful information Michael Unsworth. Interesting to read. By the way recently I attended a cloud computing conference 2010. The conference is about the latest trends and changes in the world. I gathered more useful information about the cloud computing from that site. I got an opportunity to meet and talk with experts in cloud computing conference. I participated in this conference by registering in <http://cloudslam10.com>. It was a good experience for me and helpful also.

Well, it's great to hear about your experience and thoughts of attending the conference. Thanks for sharing it here. My first conference is Cloudslam 2009 conference is the event covering all topics of cloud computing and its technologies. That was really a fantastic conference which I've ever seen. I got a good opportunity to meet and talk with the world's leading experts of cloud computing. The information which I have gathered from the conference helped in my career. I came to know about the conference through **Cloudslam09.com**.
