---

Are developers requesting VMs like candy? Feel like a PEZ dispenser for virtual machines? Find out how you can control self-service VM request and prevent virtual sprawl with a Service Catalog.

With the trial, you can set up a self-service portal, integrate to VMware vCenter or vSphere, and begin managing requests and tracking the lifecycle for virtual machines in just a few hours. newScale, a VMware Technology Alliance Partner, developed this innovative solution to complement your investment in VMware infrastructure and maximize your ROI from virtualization.

Try newScale's Service Catalog for...

Give it a try - just click [here](#). And while supplies last, participants who complete the trial get a free "Will Provision for Food" t-shirt...the must-have shirt from VMworld 2009!

Need a solution for multiple hypervisors, physical servers, and cloud services? Check out the newScale [enterprise Service Catalog](#) for the virtual data center.
