Hi,

I have installed XenDesktop 4 in one Windows Server 2003 when i start to configure , I was stopped in step to creat a Desktop Group me i chose in the hosting infrastructure VMware Virtualization i put our ip adresse of VMware so not working.after my serach i found i found i should the SDK directory, how do I create this and what should it contain also how can i enblae https in the esx

if you have any idea for help i will be thankfull

Many thanks
