

# Need to make a Virtual Machine from...

---

Yuri 1

2010-2-26

then load the virtual machine into another server (#2) and shutdown the server #1 .

What product can do it?

Greetings!

virtual, machine, server, shutdown

There are 2 steps. (if i understand your question)

1) use VMware vCenter Converter <http://www.vmware.com/products/converter/> for make VM from existing server.

2) add new VM to inventory and start it manually.
